

Our burndown chart is the image given above. As seen, we managed to complete our tasks for sprint 4. However, there were some unforeseen issues that we encountered during the sprint, such as bugs and the underestimating of certain tasks. As such, we had to make several changes to the sprint tasks, such as adding tasks for debugging and the reevaluation of others. As many of these tasks took a while to complete, most of our tasks were completed in the latter half of the sprint. Our velocity is better than our sprint 3, as we managed to complete all the tasks we set out for this sprint.
